

Creative Design Activities

Design your own scooter gear/super hero

Have a look at the Creative Design Activities 1 and 2 on the worksheet.

Read the words on the first page of each as they will tell you all about wearing scooter gear and super-powered super heroes!

Ask an adult or older brother or sister if you need help with some of the words.

You can then design your very own scooter gear, thinking about the different qualities of plastics that might be needed to do the job.

The second activity lets you design your very own super-hero, again thinking about which sorts of real and imaginary plastics work best.

Tip: Use the plastics ID sheet to help you choose your plastics!

As a bonus activity, you might like to colour in (or copy the outline and colour in) the super-hero Superduper with his superfast running blades!

See colouring in sheet on next page.
